

# The Crown Promenade's Journey to Energy Efficiency

Crown invested in an extensive energy and water monitoring and reporting system that identified sustainability initiatives.

With the help of the Green Building Fund, Crown Promenade Hotel was able to upgrade their lighting and air conditioning systems.

1. Installation of over

**9000**

energy efficient lights

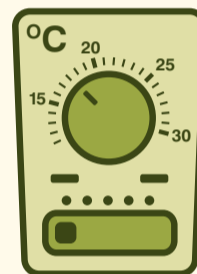

2. Installation of over

**120**

motion sensors

3. Incorporated

state of the art ventilation controls

## ALL OF THIS COULD RESULT IN:

Raising our energy performance from

**0 to 3 star NABERS**

(National Australian Built Environment Rating System)

This potential new rating could equate to a

**32% saving in greenhouse gas emissions**

The Crown Promenade's energy upgrade was a collaborative effort with particular mention to hotel, housekeeping and maintenance employees.
