

## HOW TO PLAY

### Objective

The aim of the game is to achieve 7 consecutively drawn cards of the same colour.

### How to play

There are four permissible wagers that a player may place: Red, Black, No S7REAK and Suit Up.

The dealer will deal the first card and place it in the S7REAK card box, determining the winning colour of the S7REAK for the round.

The dealer will then continue to draw cards if they are the same colour as the S7REAK card colour.

The S7REAK will end once a card of the opposite colour is drawn or 7 in a row is achieved.

### Suit Up

The Suit Up wager pays according to the maximum number of one suit within the S7REAK cards for that hand. The suits do not need to be consecutive, and the Suit Up wager can be placed independently of a Red, Black or No S7REAK wager.
